Steve - let's discuss the state blackberry, doesn't make a whole lot of sense.

As for the equipment, the commo team was limited in some capacity because we did not have authorization from owners of residence to install equipment. We did it regardless. Additionally, as S knows, the team didn't have access to the property until a couple of hours before S arrived. Finally, as even the white house attested, this was a pretty wide spread problem, not just affecting us. So we should bear that in mind.

Subject: S Communications

Cheryl,

Thanks again for alerting me to the communications issues the Secretary has been having. Here's a status report. b7E per DOS

- On the immediate problem of the Secretary's not being able to have her calls transferred [REDACTED]

- On the more long term issue, I've asked our team to develop an enhanced package of capabilities and equipment that we would propose deploying with the Secretary to be as closely co-located as possible with her when she is on travel away from her usual residences. The package will include things that anticipate the normally unexpected such as hurricanes, power outages, earthquakes, locusts, etc, such as generators, uninterrupted power supplies, supplementary satellite capabilities, including satellite phones for when local infrastructure fails (as it did in NY over the weekend).

Separately, we are working to provide the Secretary per her request a Department issued Blackberry to replace her personal unit which is malfunctioning (possibly because of her personal email server is down). We will prepare two versions for her to use - one with an operating State Department email account (which would mask her identity, but which would also be subject to FOIA requests), and another which would just have phone and internet capability. We're working with Monica to hammer out the details of what will best meet the Secretary's needs.

Please let me know if you need anything more for now, and I'll be in touch with the above longer term options soon.

Thanks,

Steve

so I have now read up more on POTUS' bb (which appears not really to be a bb but a different device).

is there any solution to her being able to use an encrypted bb like the nsa approved one he has in the vault and if so, how can we get her one.

and if not, let's set up the office across the hall for her to use - it needs a phone etc. so she can go across the hall to check her bb.

Dear [REDACTED]

This letter provides consent, in connection with the Department of Justice's investigation into the use of a private server by former Secretary of State Hillary Clinton, to search the Lenovo Yoga 2 Pro (Serial No. [REDACTED]) (hereinafter "the Device") belonging to my client, Heather Samuelson, who is Secretary Clinton's attorney, pursuant to the terms described below. The Device is being provided to the Federal Bureau of Investigation ("FBI") solely for the purposes of this Department of Justice investigation, and for the Department's use in connection with the investigation. In voluntarily providing the Device, Heather Samuelson does not relinquish ownership or control over the Device, except for the FBI's limited investigative use as specified by this agreement. The FBI does not assert custody and control over the Device or its contents for any other purpose, including any requests made pursuant to the Freedom of Information Act, 5 U.S.C. § 552.

b6
b7C

- 1) You have confirmed that the sole purposes of the search are: (1) to search for any .pst files, or .ost files, or compressed files containing .pst or .ost files, that were created by Platte River Networks ("PRN"), after June 1, 2014 and before February 1, 2015, in response to requests for former Secretary Clinton's e-mail from her tenure as Secretary of State, (hereinafter the "PRN Files"), including in an intact but deleted form, (2) to attempt to identify any e-mails from, or remnants of, the PRN Files that could potentially be present on the Device; (3) to identify any e-mails resident on the Device sent to or received from the following e-mail accounts: hdr22@clintonemail.com; hrod17@clintonemail.com; hr15@att.blackberry.net; and hr15@mycingular.blackberry.net (hereinafter the "Relevant Accounts"), for the period

of January 21, 2009 through February 1, 2013 (hereinafter the "Relevant Period"); and (4) to conduct a forensic analysis of the device to determine whether the Device was subject to intrusions or otherwise compromised.

- 2) You have confirmed that Phase One of your search will proceed as follows:
 - a. Your Technical Team (to include FBI technical personnel only), will review the allocated space (*i.e.*, active files) of the Device to search only for the PRN Files. Neither the Technical Team nor anyone else will review during Phase One the content of any .pst files, or .ost files, or compressed files containing .pst or .ost files that can be identified as created before June 1, 2014 or after January 31, 2015.
 - b. The Technical Team will review any files identified pursuant to subsection 2(a) above to determine whether they contain e-mails sent to or received from the Relevant Accounts during the Relevant Period. The files that do not include such e-mails will not be subject to any further review by anyone for any purpose, unless they meet the criteria identified in Phase Two or for purposes of an intrusion analysis, both set forth below.
 - c. The PRN Files that include e-mails sent to, or received by, the Relevant Accounts during the Relevant Period will be provided to a Filter Team, which will be limited to two attorneys, one FBI agent, and one FBI analyst, none of whom are members of the investigative team.¹
 - d. The Filter Team will review the contents of any file they receive from the process described in subsection 2(c) to identify and remove: (1) any privileged material; and (2) any material they can determine is not an e-mail sent to, or received by, the Relevant Accounts during the Relevant Period.
 - e. You will notify us of the results of Phase One of the search before proceeding to Phase Two of the search.
 - f. You will proceed to Phase Two of your search only in the event that the PRN File containing approximately 62,000 emails from the former Secretary's clintonemail.com account is not identified in the allocated space of the Device.
- 3) You have confirmed that Phase Two of your search will proceed as follows:
 - a. The Technical Team will search the Device, including the Device's unallocated space, to identify any e-mails, fragments of e-mails, files, or fragments of files: (1) that include e-mails sent to, or received by, the e-mail addresses hdr22@clintonemail.com and hrod17@clintonemail.com during the Relevant Period or for which the date that the e-mail was sent or received cannot be determined; and (2) that include e-mails sent to, or received by, the e-mail addresses hr15@att.blackberry.net and hr15@mycingular.blackberry.net that

¹ Should there be an extremely large volume of materials located on the Device and provided to the Filter Team, we understand that the Department of Justice reserves the right to expand the number of Filter Team members in order to avoid significant delay in the review process. If such an expansion were necessary, the Department of Justice has agreed to inform us of this change.

can clearly be identified as having been sent to, or received by, those accounts during the Relevant Period.² Aside from the intrusion analysis described below, neither the Technical Team nor anyone else will search or review the Device for any other material or for any other purpose.

- b. The Technical Team will review the results of the foregoing searches for the purpose of removing any file or data that is not an e-mail or a fragment of an e-mail sent to, or received by, the Relevant Accounts during the Relevant Period. Aside from the intrusion analysis described below, such material will not be further reviewed by the Technical Team or anyone else for any other purpose.
 - c. The remaining results of the search will be provided to the Filter Team, which will review those results to identify and remove: (1) any privileged material; (2) any material that, upon further review, is determined not to be an e-mail sent to, or received by, the Relevant Accounts during the Relevant Period, and (3) any material that, upon further review, is determined not to be a work-related e-mail sent to, or received by, the e-mail account hrod17@clintonemail.com. Aside from the intrusion analysis described below, such material will not be further reviewed by anyone for any purpose.
- 4) You have confirmed that you will also conduct a forensic analysis of the Device to determine whether the Device was subject to intrusions or otherwise compromised, without reviewing the content of any user created files, including .doc, .xls, .pdf, .jpeg, or e-mails not captured in the aforementioned searches.

As soon as the investigation is completed, and to the extent consistent with all FBI policies and applicable laws, including the Federal Records Act, the FBI will dispose of the Device and any printed or electronic materials resulting from your search. No part of this letter shall be read to imply the consent to retrieve from the Device any data other than the data described above or to conduct any search or review in any manner other than as described above.

Sincerely,

Beth A. Wilkinson

² If a large volume of e-mails from the hr15@att.blackberry.net and hr15@mycingular.blackberry.net accounts -- for which a send or receive date cannot clearly be determined -- are located, we understand that the Department of Justice reserves the right to discuss further with counsel any additional search efforts that could be undertaken to assess whether such e-mails were sent or received during the Relevant Period. The Department of Justice will not undertake any such search without prior discussions with counsel and an agreement with counsel as to the scope of, and procedures to be used during, that additional search

I am no longer with HRC's office (Jan 31st was my last day) but I wanted to try to finish the HRC email project which requires sending all of her archived email to your server. You recall that we couldn't figure out a way for you to connect to the laptop that I have in my possession.

Do you have time to try tomorrow? Last time, I tried from HRC's home but tomorrow I can try from my home, which has good wifi

I'm adding [] for her situational awareness [] as soon we've transferred the email, I'll figure out a way to get the wiped laptop to you.

Monica

Derek - Tracked changes, both substantive and trying to help you start to clean it up. I can imagine you are bleary eyed! Impressive effort from the team. I note that I won't be able to get Jack's input until tomorrow so my input should not be construed as clearing, but I also don't think we're at the "process" point yet and rather this is a collaboration. - pc

Subject Draft Holbrooke Team
Attachments Pak Paper 10-03dcj's.docx

HRC

Attached is the draft memo in its current state from the Holbrooke team (it does not yet include RCH's hand edits which he just sent in).

As you will see, the beginning of this memo lays out 4 strategic interests, 3 of which overlap with the goals we discussed in our conversation, the fourth goes to the international consequences of success or failure.

Assuming we go with the approach we discussed, a cover memo should work reasonably well with this document (excepting the discussion on the foreign aid piece). See if you agree.

To actually see the document in its current form with showing edits, you need to print the attached version.

Below is the version that accepts all the proposed edits and eliminates the comments so you can read on BB if you choose.

Madam Secretary,

Also wanted to give you option of having conop slides brought to your house in morning by INR. Think an oral brief from me will be enough but let me know if you'd like actual slides set. I gave Bill general brief today so know his point of view.
Thanks

Almost impossible to believe only two more weeks-- somewhat unimaginable. Thank you.

Madam Secretary,

Events have been fast moving in the Central African Republic today after protestors, probably encouraged by the government, breached a wall of the French embassy and also protested outside of ours. Interagency conference calls, led by Johnnie, resulted in General Ham developing a conops to move as soon as tomorrow 1500 through an ordered departure. We anticipate having to move about 70 people including our 8 Embassy personnel and some minors. We just completed a conference call with Denis McDonough, General Ham, John Brennan, Johnnie, Robert Cardillo, Kathleen Hicks, Chris Wood, Avril Haines and others to review planning and decisions. Kathleen Austin-Ferguson from Pat's office joined as well. The following is agreed:

You have built a strong team, your vision is clear and objectives indelible so we will all carry on with your leadership even in your absence. And, of course, we are all ready to do whatever is needed. Hope you feel better soon

In response to your question on what DoD deemed classified on #11688, it was the section regarding Pakistani internally displaced persons, but I can't see why. It may have been an overzealous FOIA review. The second review by our prepublication team did not spot classified material in that document.
I will follow up to see if I can get clarification.
